

HIGHLIGHT

GETEX program, by

CONECTUS

OFFICIAL INNOVATION PROVIDER

Who are you?

Conectus is a Society of Acceleration of Technology transfer (SATT), operating for and on behalf of all public research organizations on Alsace territory. Our main goal is to invest in R&D projects, generate or reinforce patentable results and facilitate transfer of technologies to industry.

What is your expertise?

Conectus team, expert in technology maturation and transfer, invested into a R&D program initiated by IGBMC in Strasbourg. The research team is an expert in Fragile X syndrome (FXS) and is working on the search for new therapeutic solutions for this syndrome. Recently, they have identified a new therapeutic target directly implicated in FXS.

What is GETEX program?

Development of a gene therapy to treat FXS:
We've patented the therapeutic approach on
this innovative target and invested into in-
vivo POC experiments with very good results
on phenotype and biomarkers. We are
looking for a **partner to continue the
development, in collaboration with the
inventor.**

Can you sum up GETEX program in **3 words**?

- Licensing opportunity
- Gene Therapy
- Fragile X syndrome
